Dear Miss Dixon,

The town of Ely  
Groves is filled with  
railroad tracks. My  
grandson looks out his

1 cont.

bedroom window on one that would carry nuclear waste if you decide to transport this dangerous cargo.

We have disturbed our environment enough without further risking the health of our children.

2 NO ONE TALKS OF CONSERVATION ANY MORE - JUST CONSUMPTION OF OUR RESOURCES.

3... If nuclear waste is shipped there will be (2)

accidents.

Please keep the waste where it is and start figuring out how to make it safe there. This should have been considered before building the nuclear plants.

Thank you.
